THE EXMERIT SCHOOL MANAGEMENT SYSTEM

The System can be customised to suit particular needs of the school.

PRICE (Per Term):

Learners Between: 0 - 300 = 500,000/=

Learners Between: 301 - 600 = 600,000/=

Learners Between: 601 - 900 = 750,000/=

Learners Between: 901 - 1200 = 850,000/=

Learners Between: 1200 + = 950,000/=

We give a Trial Period of 3 months

E-Learning Platform

We have a customisable digital platform that provides a centralised space for your Learners and teachers to upload and access learning material and integrate features. It is, in many ways, the school's online hub, representing an essential piece of the teaching and learning puzzle.

Networking

We Undertake a Survey/Audit of your existing ICT equipment and where it is used throughout the school such that we can get a proper understanding of your needs. We can Set-up a LAN, be it wireless or with cable and can also assist in searching better Internet Services and Manage ISP on your behalf.

Security Systems

Ensuring the safety of students within school walls is a paramount responsibility for Teachers and administrators. Schools are increasingly turning to sophisticated security systems designed to create a secure and nurturing student environment to achieve this. Our school security solutions leverage a combination of advanced surveillance technology, and robust physical safeguards to build comprehensive protection for everyone at the school.

We have affordable CCTV packages that ensure the school is fully covered. Upon request a comprehensive survey is carried out to ascertain suitable installation needs for your institution.

Time, Attendance & Access Control Systems

With NSL's access control solution, schools can limit access to certain offices, dormitories or parts of a building and can define which areas the staff, students, and visitors can access. It is a simple and easy solution to meet compliance, gauge access levels, and keep a watch on their attendance.

We help you capture students' attendance with academic performance performance without having to engage manual school registers.

Intercom | Voice

Our Smart School Package comes with the best Intercom solutions including Public Address Systems and phones to ease the communication needs of the school.

Installation fees are derived after a comprehensive survey has been carried out and maintenance fees are negotiable

Technology has significantly changed our lives over the past few years in a variety of ways. Blackboards, white chalk, books, notebooks, and dusters are no longer used for teaching and learning as traditional classrooms are evolving into 'smart' classrooms.

IT Support

This is inclusive of all Computer Repairs, maintenance services, equipment supplies and all IT Related services that the school may require.

Other Services

On top of the services offered above in the Smart School Package, we also do;
Electrical and Solar Installations and Maintenance and IT Consultancy.
